

Annex 1

Cargo Declaration and „Declaration of no objection“

Our airlines and their handling offices at the airports are required to carry out strict baggage checks. Unidentified items, especially those made of metal, will not be carried. To ensure that your important spare parts are not sorted out at the airports in the future, please inform the staff that a strict separation of private and company luggage is carried out. Company luggage must be accompanied by the registration and declaration of no objection below. Any type of baggage (of the appropriate size and packed in accordance with the cargo regulations) can be handed in at the normal check-in on the day of departure. However, it is necessary that we are informed by FlyCar GmbH at least one day in advance in order to be able to carry out the unbu-reaucratic processing for you in advance.

Carriage of freight more than **50KG** requires reconfirmation by FlyCar GmbH.
