

**"Certificate of Compliance" in regard to baggage and cargo handling**

Our airlines and their custom clearing offices at the airports are required to carry out strict controls on baggage. Unidentified objects, particularly those made of metal, cannot be transported. To ensure that important spare parts are not screened out and removed at the airport, please inform staff that private and business baggage must always be strictly separated. The registration and certificate of compliance which appears below must be completed for the carriage of baggage belonging to the company. All types of baggage (packed according to the provisions of freight and of an appropriate size) may be presented at check-in on the day of departure. It is, however, **necessary to inform FlyCar GmbH of such at least one day in advance**, in order to pave the way for an unbureaucratic process.

**Carriage of freight weighing over 50KG requires confirmation by the company FlyCar GmbH.**

**Registration and certificate of compliance:**

**We, the company:** \_\_\_\_\_

**Address:** \_\_\_\_\_

**Confirm that the articles hereby presented originate entirely by persons known to us and contain:**

- 1.) no hazardous materials**
- 2.) no oily substances**
